

ENHANCING MATHEMATICAL PROBLEM SOLVING AND DISCOURSE GRADES K-5

Effective teaching of mathematics engages students in discussing solutions to tasks that are designed to enhance mathematical reasoning and problem solving while providing multiple entry points and varied solutions. Participants will explore the characteristics and cognitive demand of various mathematical tasks as well as the teacher and student behaviors necessary for successful implementation of high-level mathematics tasks. Participants will also explore different question types, questioning patterns and the components necessary for a culture of discourse in a mathematics classroom.
