

# Let's Get It Write

An Overview of Writing Workshop

Dive into writing and learn about the instructional model known as Writing Workshop.

Throughout this interactive workshop, participants will see ways to establish a writing culture and create a community of writers in their classrooms. This session is meant to help one be sure the pieces are in place to create a physical, emotional, and cognitive environment ripe for workshop. Special areas of focus for the session will include the teacher as writer and the importance of conferring with clear, actionable steps.

Please bring your Current Writer's Notebook (or a single-subject notebook that could become one's Writer's Notebook).
