Are you wondering how to encourage your students to become innovators who are responsible for finding solutions to everyday problems? Are you searching for ways to allow your students to be creative and reflective in their thinking? If you answered yes to either of these questions, come join us to learn how to design learning experiences for students that provide them with opportunities to acquire content-area skills while they learn to communicate, collaborate, design, model and prototype. Two strands will be offered, one with a focus on coding and another with a focus on circuitry.

CODING

Date: November 28 and 29, 2017
Time: 8:30 - 3:30
Location: Corbett Inc.
56 Buttonwood St.
